Course Overview

Looking to learn more about project time management and utilization? If so, our Primavera P6 course is the perfect solution for you! Many project managers find it difficult to manage projects efficiently, especially when utilizing complex tools and applications like Oracle's Primavera P6. This course aims to simplify the learning process and make understanding the software a breeze.

Our course is designed to help reduce confusion and obstacles that hinder understanding of the software, enabling trainees to comprehend the software's practical applications more easily. As Primavera P6 is a complex software, one training course may not suffice, which is why we provide unlimited and unrestricted access to the course content. The course is created in a manner that utilizes practical applications, enabling trainees to learn how the software performs in real-life scenarios.

The course's aim is to enhance your understanding of Oracle Primavera P6. Whether you want to clear up any ambiguities about the software and its process or polish and enhance your skills, our course caters to all your varying needs regarding the Primavera P6. By having a clear understanding of Primavera P6 as scheduling software, you will be better equipped to produce effective and efficient project schedules that enable the project manager to manage projects successfully.

What is Primavera P6?

Primavera P6 is a project management scheduling software that provides effective and efficient project management due to the amount of management control it has to offer to its users.

This product recognizes andwipes out any potential dangers in various parts of a project, like analyzing, managing, planning, etc., thereby helping to reduce the amount of risk associated with a project. By carrying out risk reduction and efficient management, Primavera can also help to cut down the costs associated with the project.

Who should attend this course?

Anyone belonging to the field of construction projects and project management shouldtake this course in order to carry out projects in an enhanced manner. The target audience for this course is:

Planners, SchedulersPlanning Engineers Program Managers

Project Managers End Users

Construction Companies

Project management ConsultantsBusiness Analysts

Small to Large Enterprises

IT companies, and any organization or individuals involved in any form of projects.

Why shall I attend this course?

This course is designed to enhance the Oracle Primavera P6 application skills of Engineers, Project Managers, Construction Managers, and other project management-related staff. The software is versatile and sophisticated, with extensive capacities of performing a diversified set of tasks.

By attending this course, individuals will not only improve their competency but also be able to carry out projects with effective timelines and schedules, ensuring a high success rate. This can result in career growth opportunities for those who are looking for professional training and certifications in Oracle Primavera, Earned Value Management (EVM), Critical Path Method (CPM), Key Performance Index (KPI), and other Primavera features for better project engineering and management.

What this class has to offer?

The course is divided into two distinct formats, theory and application, each with its own unique focus. During the theory section, the course instructor will provide an in-depth explanation of the software's scope, operations, and tools.

Trainees will receive accurate theoretical data that will be helpful in their future endeavors. Additionally, a step-by-step guide for each tool and application will be presented along with a demo of the software's utilization. This section of the course will provide trainees with the necessary foundation to understand the software's functionalities and how it can benefit their project engineering and management efforts.

To ensure that trainees fully grasp the concepts taught in the course, our instructor provides hands-on experience opportunities for them to practice and improve their Primavera application skills.

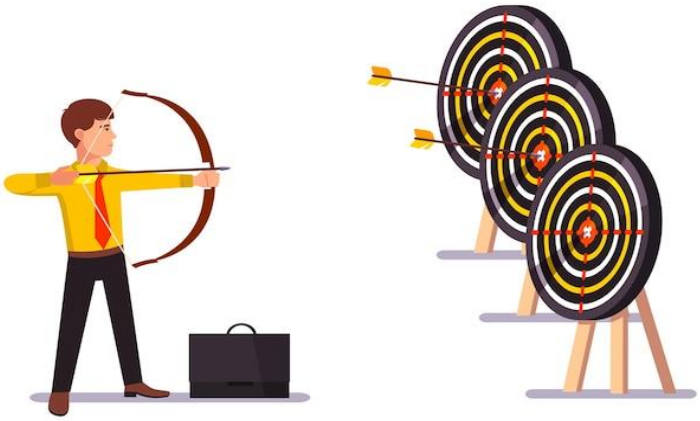

PLANNING ENGINEER

This practical experience is crucial in enabling trainees to not only understand the concepts being taught but also identify areas where they may require additional support. By testing themselves and their learning, trainees can determine which areas need improvement and identify their problem areas concerning the software.

The course delves into the application of Primavera P6 in great detail, covering project development plans centered around the software. With our course, you will significantly enhance your understanding of the software, making it easier to analyze various aspects of construction planning and project management, including critical path analysis, resource allocation, project progress tracking, delay analysis, and techniques for managing claims. All individuals involved in construction projects, from project managers to planning engineers, can benefit from the comprehensive content of this course.

What makes this course unique?

What makes this course unique is its focus on enhancing and refining the trainees' practical application of the Primavera P6 software rather than simply providing them with a deluge of information. Apart from an in-depth explanation of the features and tools of Primavera, the course will also involve a real construction project to simulate the software's capabilities in the context of real-world project management.

This hands-on experience will provide practical insights and enable trainees to seamlessly integrate Primavera into their project engineering and management workflows. Additionally, the course will cover tips and tricks for using Primavera, as well as Excel features that complement Primavera in BOQ, Baseline, Layouts, and other areas. Finally, the course is highly responsive to feedback from trainees and welcomes their comments and suggestions for additional course material.

Course Instructor

The course material has been crafted in collaboration with a skilled planning and control manager who possesses 20 years of practical experience in managing high-end mega projects. In addition to this, the course instructor holds a degree in management of construction projects and infrastructure from Liverpool University, United Kingdom. Our ultimate goal is to equip engineers with top-notch course content that will help them acquire invaluable techniques and develop the necessary skill set to excel in their field.

Certificate of Completion

Completing this course and receiving the certificate of attendance can enhance your professional reputation and provide a competitive advantage in the job market. The certificate serves as tangible evidence of your newly acquired knowledge and skills, and can demonstrate to potential employers or clients your commitment to professional development.

In addition, having completed this course and earned the certificate can open up new opportunities for career advancement or career change. It can also serve as a foundation for pursuing more advanced courses or certifications in the field of project management.

Our Promise

At our organization, we are committed to providing our trainees with more than just theoretical knowledge of project management. We are dedicated to helping our trainees improve their skills and abilities in the field. We understand the desire for growth and development, which is why we strive to provide course content that meets everyone's expectations.

Our promise to our trainees is to not only deliver conventional knowledge on project planning and monitoring but also practical techniques that can be applied in real-world situations. We are dedicated to ensuring our trainees' complete satisfaction with our courses.

However, in the unlikely event that you are not satisfied with the course and its material, we offer a full refund.

Some Reviews on Our Page

Nabeel Afzal ★★★★★

Planning & Coordination Engineer

Overall an amazing learning experience to refresh your Basic Concepts. I much appreciate Heny for organizing such a virtual learning platform. Thank you Sir for giving me such an excellent opportunity to got benefit from this.

Christian Angelo A. Erica ★★★★★

Project Engineer

I'm writing this review to show my appreciation to Mr. Hany Ismael, and the Planning Engineer Est. Team. I took the Primavera Basic Online Course, and its content is exceptional, and is based on real world workflow of utilizing Primavera P6. Taking the course seems to equip you with 1 to 2 years of working experience as a Planning Engineer. This material just brings prestige to the Planning Engineer profession. Great job! I'm so thankful for this.

Abdul Qadir ★★★★★

junior planning engineer

unparalleled content regarding planning management on internet.i highly appreciated the way you explain each and everything with real world example.thank you so much sir.live long

Mohamed Arshath ★★★★★

Project Planning Engineer

I am happy with the content of the course, like the case-based approach.

Naveed Ahmed ★★★★★

A good & practical Primavera Online Basic course

Many Thanks to Sir Hany Ismael. One of the best course for the Engineer who want to start career as a planning Engineer. Each concept in this course is simply and clearly defined. Highly Recommended.

Muhammad Atiah El Adawy ★★★★★

Great Introduction to Project Planning & Management

Many thanks to you Mr. Hany Ismael, it had been an enjoyable course with an incredible mix of simplified and deeply effective planning concepts, and I also found the written lessons very useful, Highly Recommended!

Bola ★★★★★

A practical course with an experienced instructor.

I found this course to have the right level of difficulty for a P6 beginner. A lot of hands-on training with actual project scenarios in the Construction Industry. You will be taught tricks to make you more efficient on the job.The instructor is very knowledgeable and will set you up for success so take very good notes as you go along in the course. I will definitely be recommending this course to others.

Muhammad Iqbal ★★★★★

GREAT WEBSITE AND EXCELLENT TUTUORS

Dear Hanny, Aoa | Thanks for the very useful information and guidance regarding Project planning and scheduling using Primavera software. You people are really presenting great tutorial videos, sheets, and other stuff related to the subject and helping people. i have watched may youtube videos on P6 from different experts around the world but my satisfaction found a destination at your door. I am really satisfied by your videos which provide a clear step by step path for the beginners in this field and keep them guided right from first step to the top of the roof.Your paid courses are amazing and valuable.But i would say here that to be benefitted at most from these courses and become a professional planning Engineer one should have some field experience in a construction project like buildings, Highways, Bridges, Dams etc. as the most critical task is to link the activities logically in a sequence as are done actually in the field (construction Project).

Online Primavera

Course Content

Introduction

- Main skills
- Planning Engineer Responsibilities
- Planning Main Skills

The Contents Of the Project Management Plan

- How to read and understand Primavera Time Schedule
- Project Cash flow and Manpower Histogram
- Shop Drawings Tracking Log
- Materials Procurement Tracking Log
- Weekly / Monthly Reports

Excel Fundamentals for Planning Engineers

- Excel Fundamentals for Planning Engineers
- Create an Activity List with what you earned.

Oracle Primavera Fundamentals

- Primavera Step-by-Step Download and Setup

Create Activity List and Cost Loading

- Create Activity List and Cost Loading

Create a Schedule Time Frame in Primavera

- Create WBS and Activity codes in primavera
- Import activity list from Excel to Primavera
- Estimate the activities duration in Primavera
- Link Activities and define activities relationships in Primavera
- Add the cost to each activity in the schedule

Add-Shop-Drawings-And-Materials-Time-Schedule

- Add shop drawings to the time schedule
- Add materials submittals, approvals, procurement and link them to activities
- Create shop drawing -and- procurement tracking log.

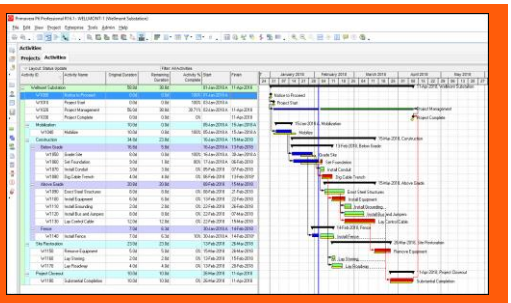

Estimate Manpower - MANPOWER Loading Sheet

- Estimate the Manpower
- Create resource loading sheet on excel
- Standard Labor Productivity rates.
- How to import Manpower from Excel to Primavera

Review A Primavera Time Schedule

- How to review a primavera time schedule for contractor and client
